# Ventis

## THE VENTIS RANGE FROM FBT COMPRISES FIVE VERSATILE LOUDSPEAKER ENCLOSURES FOR EITHER PORTABLE USE OR FIXED INSTALLATION

**VENTIS 115A**  
700+200W  
**VENTIS 115**  
500W

**VENTIS 112A**  
700+200W  
**VENTIS 112**  
400W

**VENTIS 110A**  
700+200W  
**VENTIS 110**  
300W

Available in either passive or bi-amplified versions, each of the models - **the VENTIS 115, 112, 110, 108 and 206** - has been designed to meet the highest standards in both performance and aesthetic appeal. For the VENTIS range, quality and flexibility are the watchwords. Based on a powerful combination of B&C compression drivers and FBT's own custom, long excursion woofers, the 115, 112, 110 and 108 models are two-way, bass reflex designs housed in 15mm birch plywood. A full-grille design backed by specially treated acoustic cloth delivers the characteristic style for which FBT is known, while fully rotatable constant directivity horns ensure accurate coverage.

**The five enclosures are as suitable for fixed installation as they are for use on the stage.** M10 points are included as standard while an optional U-bracket can be used for wall-mounting. For use on the road, the VENTIS models include aluminum handles with rubber inserts, a 35mm polemount socket, and a 45° sloped profile for unobtrusive placement on-stage as a monitor.

Meanwhile the multi-purpose **VENTIS 206** can be deployed as a front fill, an under-balcony fill, as a main providing pristine speech intelligibility or simply as the full-range companion of a subwoofer. Constructed in 12mm birch plywood, the 206 has an integrated rear handle, an optional mounting bracket and, most importantly, an astonishing size to SPL ratio.

The new coaxial monitors in bass reflex **Ventis 112MA and Ventis 115MA** expand the active and passive range of the series. Thanks to the B&C custom transducers they are capable of a 132dB SPL. The two enclosures are built with a 15mm birch plywood and they can also be used for fixed installation and FOH thanks to 35mm pole mount socket and to the inserts for optional mounting bracket.

Power for the active **VENTIS** models comes courtesy of a specially designed, Italian made switching mode amplifier module. Low frequencies are driven by a highly efficient 700W RMS (full bridge) Class-D topology, operating with extremely low THD. For the HF stage, a 200W RMS performance is delivered via a meticulously crafted Class-H / AB design.

Finally, DSP on-board the VENTIS enclosures is both user friendly and powerful. Located on the rear of each enclosure, a menu-driven system is navigated via a single rotary control with push-to-select functionality. A total of 6 pre-optimised settings are available (see below), plus 2 further slots for users to form their own designs, using 5 parametric equalizers per slot. Also available is a high-pass filter, a mic/line selector, low, mid and high tone settings and an optional delay of between 0 and 3.5 metres. Finally, users can exclusively choose between two limiter modes, MAX-SPL or MAX-QUALITY, to best suit their performance.

**The VENTIS Presets**

The FBT VENTIS range offers powerful DSP with 6 versatile presets. Crafted by expert FBT engineers, the presets offer a performance for every requirement.

**ORIGINAL / LIVE** The renowned, smooth FBT sound

**VOCAL** A special EQ setting to maximise speech intelligibility

**DJ** Designed to keep the energy high and your audience dancing

**TOURING** The reliability and the roar of the industry's most popular touring systems

**LOUDNESS** The ultimate preset for listening at a medium or low volume

**WARM** A special setting to emphasise full-bodied, low-mid frequencies.

## X-PRO AND X-SUB AIM FOR SUCCESS!

No matter whether you're performing on stage, delivering a business presentation or designing the highest quality fixed installation, you want to leave an indelible mark on your audience. That's when FBT's new **X-PRO** series of powered speakers can help you make a difference. Constructed out of plywood enclosures finished with extra-texture paint, the **X-PRO** series is cut to withstand tour-tough conditions with Italian elegance and style. Professional features include ergonomic handles, M10 flying points, a monitor taper design, and a full protective grille. Meanwhile the onboard Class D amplifier module delivers an amazing 1000W power with a flexible DSP to allow personal EQ adjustments, while the low frequency response can be extended courtesy of the dedicated X-SUB 18" AND 15" powered subwoofers. Now the range, which already includes both active and passive 10", 12" and single 15" models, has been expanded with the bi-amplified X-PRO 215A, a two-way bi-amplified system rated at 1600W (Class D) + 200W (Class AB) to deliver 129 / 132dB SPL.

Designed as the perfect partner for the **X-LITE** and **X-PRO** series, FBT introduces the new **X-SUB 15SA** powered subwoofer. Loaded with a single 15" heavy duty woofer, the **X-SUB 15SA** is controlled by a 1200W Class D amplifier with DSP at 6 presets allowing perfect tailoring of the extended low frequency to the midhigh.

The rugged plywood enclosure is built to withstand touring conditions, yet crafted with Italian style to suit the most elegant fixed installations. Finally, the M20 thread allows for pole mounting on a 3-way system design.

Handles, **M10 rigging points** for suspended installation, 35mm stand socket and 35° or 45° monitor taper, all included to make the speaker adaptable to any application

# PROFESSIONAL LINE ARRAY

**VERTUS CLA** was created with the thought of **integrating professional line array technology in an extremely compact and elegant speaker column.**

Compared to the traditional two-way speakers, the **sound is distributed much more evenly throughout the audience**, both in outdoor and in indoor environments acoustically difficult or reverberating as well. The CLA cylindrical wave front boasts the pleasant effect of present and precise forwardly projected sound. Even acoustic feedback towards microphones is reduced.

VERTUS CLA is a light and compact modular line array system created for both live and fixed installations, comprised by two products:

- **CLA 604A:** bi-amp two-way active column speakers **400 + 100W RMS**
- **CLA 208SA:** active subwoofer **600W RMS**

**CLA604A is an extruded aluminum column speaker** fitted with **6 x 4" custom woofers and 4 x 1" dome tweeters**, each coupled to a wave guide. The internal **Class D amplification**, 400W for woofers and 100W for tweeters with switch mode power supply and **DSP processor with 4 equalization presets** provide unexpected dynamics in a system of these dimensions.

The rapid latching system with pins allows for the expansion of the system, doubling-up CLA604A modules to form a unified column with an absolute and coherent source integration and increase of SPL and low-frequency directivity control.

**CLA 208SA is a 2 x 8" active subwoofer in bass-reflex design and birch ply enclosure.** The internal Class D amplifier delivers 600W and is matched with a switch mode power supply and a DSP processor with filtering functions, equalization and speaker protection. **Created with the idea of extending the CLA608A's low frequency performance in live applications**, the CLA208SA serves as the base support for the CLA604A column speaker which can either be frontally mounted to the sub, as well as fixed upon the optional stand through the M20 socket on the upside of the sub. The CLA208SA subwoofers are modular as well, and they can be stacked to enlarge and increase the maximum SPL.

**Vertus CLA 604A**

**Vertus CLA 208SA**  
600W

CLA system features:

- **High-level sound quality** from 50Hz to 20kHz expressly developed for live performance
- **Long distance sound projection** and better SPL distribution towards the audience
- **Great and dynamic power performance** thanks to tri-amplification system
- **Lightweight and easy to carry**
- **Design and elegance** for an easy integration even in the most demanding installations
- **Very compact dimensions** enable the listener to concentrate on sound and not on speakers!
- **High horizontal dispersion**

The internal XLR signal link system and Neutrik POWERCON power supply on both the sub and the satellite, **allows for hiding wires and cables from open sight, preserving the system's clean aesthetics.**

**VERTUS CLA is a true professional line array system** that can satisfy the musician looking for a compact PA solution, easily to carry, modular, ready to use in just minutes with no-compromise quality. It is **capable of being integrated into any environment or installation requiring high-quality sound and controlled directional characteristics.**

# VERTUS CS1000

Created as a no-compromise choice for both live performers and installers, the VERTUS CS1000 compact line array combines maximum performance with a modular, scalable approach

Its lightweight but sturdy construction blended with FBT's distinctive engineering and elegance has delivered a system that can be deployed on stage within minutes, or discreetly integrated into the most delicate of decors to provide high-quality sound and controlled directivity. A bi-amplified design, the system comprises a long excursion 12" bass reflex subwoofer and a passive mounted satellite, linked via a Neutrik SPEAKON connector and equipped with six full-range neodymium 3" speakers. Onboard the subwoofer is a Class-D, two channel amplifier, complete with switch-mode power supply, delivering 600W RMS to the subwoofer and 400W RMS to the satellite, both of which are housed in birch plywood enclosures.

For ease of use, a storage compartment is provided within the subwoofer enclosure to securely house both the satellite speaker and its supplied mounting pole for storage and transport. A dedicated locking system holds all of the equipment in place.

As with all FBT products, graceful but effective engineering is at the heart of the VERTUS CS1000, as exemplified by the mounting pole. Comprised of three sections, the pole allows users to alter the height of

Vertus CS 1000  
600+400W

the satellite to suit their requirements, while a custom joint provides continuous vertical adjustment to ensure precise coverage in every venue. No listener is left untouched by the VERTUS CS1000 - the slim proportions of the satellite facilitate a wide horizontal dispersion of 110°, while the precision placement of the six 3" drivers to form a J-array creates a vertical dispersion of 30° (+10° / -20°).

**Need more power? The VERTUS CS1000 takes a modular approach** in that two systems can be used in a dual configuration to form a totally coherent and much more powerful solution. By stacking the two subwoofers and locking the two satellites together end-to-end (via optional hardware), the maximum SPL of the overall system is raised by 6dB. Coverage is also extended - although the horizontal dispersion remains consistent, vertical dispersion increases to 40° (+20° / -20°)

Other features ensure ease of use and a rugged build quality. The subwoofer is equipped with aluminum handles complete with a rubber insert to guarantee a comfortable grip - transporting the entire system, including the subwoofer, satellite, mounting pole, joint and all cables, is both convenient and comfortable. The fanless amplifier module is protected by diecast aluminum, while onboard DSP offers a choice of eight dedicated presets, each one shaped by FBT's long experience in creating proprietary algorithms to suit every requirement.

Finally, the VERTUS CS1000 is compact in dimension but big on sound. The volume of the satellite can be adjusted in accordance with the subwoofer in 8 steps between -4.5 / +5dB range, while a selectable high-pass filter ensures optimum reproduction. And as your requirements grow, the VERTUS CS1000 compact line array will grow with you - simply combine four systems in a two per-side stereo configuration to achieve a remarkable 8.000W peak.

**StageMaxX features a 12" B&C loudspeaker custom made for FBT and coaxially mounted with a B&C 1" exit throat compression driver.**

The coaxial configuration allows perfect alignment of the acoustic centers of the transducers, guaranteeing symmetry of dispersion and

improving focus of the stereo image in Left-Right configuration.

Bi-amplification design with high dynamic Class D amplifiers delivering 400W + 100W RMS through a switch mode power supply.

Digital Signal Processor with 4 factory equalization presets provides simple and efficient EQ adjustment to optimize the acoustical response for different applications. The FOH preset allows the use in suspended installation as well as 'drum fill' applications.

StageMaxX features two lateral M10 rigging points and wall mounting bracket for different applications (optional accessories).

3 frontal status LED indicators to control ON OFF limiter and protection state.

**New Neutrik POWERCON TRUE 1 AC connector with Input and loop out to supply AC power to up to 7 additional StageMaxX speakers at 230Vac and 3 at 117Vac.**

Three ergonomic integrated carrying handles, one frontally placed to easily drag and move the monitor on stage and the replaceable Teflon feet ensure sliding on stage with minimal wear.

The cabinet has 35° or 55° tilted front panel for an optimal listening distance for single user (35°) or for more users (55°).

The 4 presets are:

- **ORIGINAL:** is the typical "MaxX" sound adapted to "STAGE" application
- **HI-CUT/DRUM FILL:** provides less mid-high for a comfortable listening in near-field at high level

## A BENCHMARK IN SOUND REINFORCEMENT

With the **HiMaxX series**, **FBT establishes a reference** point on the scenario of 12" and 15" sound reinforcement polypropylene enclosures, introducing performance and technical content of an impressive standard.

The **engineering of the enclosures**, the use of **switch mode power supplies** and **high-efficiency power amplifiers**, the custom design of the transducers made FBT's R&D team achieve the maximum in power/weight ratio.

**Three models;** two 2-way full-range enclosures in polypropylene, **HiMaxX 40** (12" + 1") and **HiMaxX 60** (15" + 1.4"), plus a compact 18" bandpass SUB in birch plywood (**HiMaxX 100Sa**). Compact and light weight, HiMaxX brilliantly solve all the most demanding needs for **bands**, musicians and professionals looking for **powerful, versatile and very high quality** loudspeaker enclosures. Ideal for live and sound reinforcement applications requiring **ease of transport**, they are also suited to **fixed installations**, thanks to the cabinets' design and optional accessories.

Amazing audio quality, thrilling performance, innovative design and extreme reliability

- A powerful dynamic design for aggressive clean-cut lines. **A sturdy light-weight enclosure that ensures great versatility** and is ready for installation, thanks to its special mounting points and optional accessories. The asymmetrical design enables the enclosures to be used as stage monitors.
- A specially designed control panel ensures **ease of use and intuitive control**. Mic/Line input, auxiliary stereo input with (HiMaxX 40a), 3-band EQ, ground-lift, diagnostic LED.

- Loudspeaker components are engineered in collaboration with B&C. FBT studied and designed **special chassis**. A **more efficient ventilation circuit** with a consequent reduction of 2dB "power compression", a **considerably stiffer** cone to improve reliability and distortion and an even **more powerful neodymium magnet** to increase control and efficiency. The voice coil has a diameter of 75 mm (3") for **higher power handling and reliability**.

- **B&C compression driver** with a 25 mm (1") throat and 44 mm (1.7") coil (HiMaxX 40) for high power handling. Thanks to the use of a shorting copper cap, high frequencies are even more dynamic and crystal-clear.

- The development of the innovative amplifier is the result of years of research by the FBT R&D labs. It manages to combine the contrasting features of **lightness, high power, efficiency and reliability**, using the very latest technology. A **switch mode power supply** to reduce the weight and increase the power output velocity, a very high performance **PWM amplifier for the low frequencies**, to maximize the power fed out with minimum heat dissipation. A **Class G amplifier for the high frequencies** enables to achieve the audio quality of a Class A, with a much higher output.

- **The silent preamplifier** manufactured with SMD technology has the job of handling the equalization, 24dB/oct crossover, sophisticated protections, limiter and the commands of the control panel.

- **The horn's profile** has been **designed** to ensure greater directivity control and lower distortion. The dispersion angle is 90°H x 60°V.

# ProMaxX

## THE NEW PROMAXX BY FBT REPRESENTS THE NEXT STEP IN THE EVOLUTION OF A PORTABLE SOUND CLASSIC

With a specially developed polypropylene cabinet and stylish full grille aesthetic, the new ProMaxX by FBT represents the next step in the evolution of a portable sound classic.

Equipped with custom FBT speakers complete with B&C's renowned compression driver technology, **PROMAXX combines true made-in-Italy quality and style.** At its heart is a purpose-built FBT amplifier module with a switch-mode power supply. For the low frequency section, 700W RMS is driven via a highly efficient Class-D topology, boasting extremely low THD. For HF, meanwhile, 200W RMS is delivered by a Class-H / AB design chosen to ensure the highest definition of audio performance at high frequencies.

Also onboard is a powerful digital signal processing (DSP) platform made available to users of all levels thanks to an intuitive graphical user interface. Located on the rear of the enclosure, the menu-driven system is navigated via a single rotary control with push-to-select functionality.

Users can choose between 6 equalizer presets, each carefully designed by FBT engineers to ensure that every application is catered for (see below). Additionally, 2 preset slots are available for users to form their own designs, using 5 parametric equalizers per slot. Also available is a high-pass filter, a mic/line selector, low, mid and high tone settings and an optional delay of between 0 and 3.5 metres. Finally, users can exclusively choose between two limiter modes, MAX-SPL or MAX-QUALITY, to best suit their performance.

The PROMAXX feature-set is matched by the enclosure's versatility, with options for pole-mounting, wall-hanging, suspension or even deployment in an array. The result is the most accessible PROMAXX yet.

Powerful and Versatile - Lightweight - Increased SPL - DSP with 8 presets

**Presets for every occasion**

PROMAXX offers 6 presets to cater for a broad variety of uses, each crafted by FBT engineers. Employing powerful DSP, the presets ensure reliability while eliminating distortion.

**ORIGINAL / LIVE** The renowned, smooth FBT sound

**VOCAL** A special EQ setting to maximise speech intelligibility

**DJ** Designed to keep the energy high and your audience dancing

**TOURING** The reliability and the roar of the industry's most popular touring systems

**LOUDNESS** The ultimate preset for listening at a medium or low volume

**WARM** A special setting to emphasise full-bodied, low-mid frequencies.

Two ergonomic carrying handles, **M10 fly points**, top-hat speaker stand socket.

2 - way enclosures have 3 monitor tapers for use as a floor wedge at 12°, 40°, 55°, providing extraordinary versatility **for monitor application.**

# MAXIMUM PERFORMANCE FROM NEW FBT JMAXX ITALY'S AUDIO SPECIALIST UNVEILS THE LATEST VERSION OF ITS POPULAR MAXX SERIES

**The new FBT JMaxX series combines ease of use and versatility for many portable or installed sound applications:** musicians, DJs, AVL contractors, rental sound reinforcement, corporate events, houses of worship, bars and clubs.

With its eye-catching gas-injected forms designed to virtually eliminate undesired enclosure resonance and reinforce strong low frequency performance, the **JMaxX series** of powered loudspeakers is available in three elegantly crafted two-way models: the 14-inch **JMaxX 114A**; the 12-inch **JMaxX 112A**; and the 10-inch **JMaxX 110A**. All are equipped with FBT's latest **90° x 60° HF horn** design which delivers improved projection, accuracy, and dispersion of the mid and high frequencies.

Providing a myriad of possibilities for bands, DJs and solo artists, as well as for permanent installations, each JMaxX model is actually four loudspeakers in one. Derived from a decade of experience of portable sound reinforcement, the carefully tailored equalisation presets offer highly intelligible response for vocals and floor monitoring; slightly boosted response in lounge bar applications; punchy and forward sound for DJs and night venues; and a general-purpose EQ setting that mirrors the original and familiar FBTMaxX voicing.

Common to all JMaxX models is FBT's latest generation lightweight 700W + 200W Class D power amplifier with universal switch mode power supply, delivering abundant power and headroom to reproduce even the largest transients without distortion.

XLR inputs and outputs, volume control, the EQ presets and filters, and ground lift switch are all conveniently located on a clearly laid out rear panel, making loudspeaker setup and operation intuitive and consistently repeatable.

More powerful Class D amplifier - Extra lightweight polypropylene cabinets - Higher SPL for optimal audio reproduction. New DSP with four EQ presets

JMaxX's versatility is further underscored by the many mounting and fixing options that the ergonomically styled cabinets provide. Mounting in fixed installations is made easy using the M10 suspension points or wall bracket flange plates, while portable use is facilitated by the built-in 35mm pole mount socket.

There's no need for separate stage monitors, as **JMaxX's cabinet profiles are designed with 12°, 40°, and 55° wedge angles**, and when used with the specific floor monitoring EQ presets, will ensure that performers hear themselves with ultimate clarity.

**The JMaxX is making its international debut on booth C78 of Hall 8.0 at Prolight+Sound from April 2nd to April 5th 2019.**

# NEW J SERIES - MORE TECHNOLOGY FOR IMPROVED PERFORMANCE AND QUALITY VALUE FOR MONEY

The **new J series** is a technologically advanced range of products that improves on the performance of the previous Jolly line. The new **J series** is a competitive, value for money range of speakers.

The range is based on the development of three new high efficiency class-D amplifiers with power specifications of 350 + 100W for the **J 15A**, **J 12A** and **DJ 15A**, 200 + 50W for the **J 8A** and 80 + 40W for the **J 5A**.

These amplifiers have been designed 'from the ground up' in FBT's R&D laboratories.

The largest amplifier model that equips the **J 15A**, **J 12A** and **DJ 15A** has a switch mode power supply as well as a digital signal processor with 4 pre-sets (ORIGINAL/FLOOR-VOCAL/BOOST-LOUNGE/CLUB-DJ).

The **J 8A** and **J 5A** amplifiers have toroidal transformer power supplies. The **J 8A** has a digital signal processor with 2 pre-sets (ORIGINAL/BOOST), whilst the **J 5A** has analog signal processing.

The speakers have been completely redesigned, introducing the technological developments of recent years to achieve a far superior efficiency and linearity.

Following from the new J series, FBT bring you the **DJ 15A**, designed with today's modern DJ in mind. The **DJ 15A** has invaluable features allowing quality audio playback using our revolutionary DSP technology. This includes 4 presets enabling the DJ to change the sound of their music to suit the environment they play within.

**A multipurpose performer:** J speakers are versatile and easy to use in applications like Band PA, DJ, personal monitor, stage performance, theatres and halls, clubs, gyms, bars and more.

**S/J8**  
Adjustable wall  
mount stand

**S/J5**

## Digital Matrix

72

The **DMM 8008** is a high performance 8 input x 8 output digital matrix mixer; Specially designed for commercial and professional application such as Conference rooms, Auditoriums, Sport utility buildings, House of worship, Pubs and Disco. It includes 8 independently switchable Line/ Mic inputs with Phantom power supply, 8 Line outputs, managed by a powerful 48kHz 24 Bit DSP engine, in addition to high performance 24 Bit AD/DA converters. The **DMM 8008** supports a full matrix mixing mode where inputs may be routed/mixed in any ratio to any output. Each Mic/Line input channel provides Lo/Hi pass 1st order filters, 3-band parametric EQ, Noise Gate function and Gain control. In addition Mic inputs include a Feedback Eliminator function, based on a powerful «Pitch Shifting» algorithm,

particularly suitable for voice applications. Automixing function automatically adjusts input level to make operating easier using either NOM (Number of Open Mics) attenuation function or Gain sharing algorithm. In addition Ducking process enforces a «priority order» of open microphones in order that high-priority inputs attenuate lower-priority inputs. Each output offers up to 5-band of parametric equalization, crossover filters, RMS compressor, Peak limiter, Phase and Delay controls; 8 digital In/Out ports are provided for general purpose (preset recall, trigger third parts or device); 8 front knobs provides a quickly way to control input Gain; Up to 32 units can be managed by software applications.

### 2 AVAILABLE MODE TO MANAGE THE DMM 8008

#### Via RS 485 / TCP-IP / USB

PC software for system design and real time control.

#### Via RS 485

Optional Wall Control Panel WP 8008 configurable for global or single zone control.

## DIGITAL LOUDSPEAKER MANAGEMENT

The DLM26 is a DSP based 2 input x 6 output Digital Loudspeaker management processor, ideally suited for fixed installations and live events. It combines the functions of a multitude of conventional products in a compact 1U unit with extensive PC remote control capabilities.

Features superb audio quality with premium hi-end AKM5392 24bit A/D converters and AKM 4396 24bit D/A converters, carefully optimized double precision signal processing coupled with 24bit conversion ensure a dynamic range >110dB. The unit can work in STANDARD MODE or in DCL MODE. The first mode permits to configure the crossover in 2x2 way + SUB, 2x3 way or 6way, the input L, R, L+R are freely assignable to each output.

In DCL mode the unit can be configured in 3ch DCL, 2ch DCL + 2ch standard, 1ch DCL + 4ch standard. DCL mode means double compressor limiter, each DCL channel have a double band limiter and compressor with assignable LO/HI split frequency.

Each input has 5 fully configurable filters, a delay of 288.66ms max in step of 6.8us, gain. Each output has 4 fully configurable filters, a delay of 288.66ms max in step of 6.8us, gain, phase, LO-pass/Hi-pass crossover from 6 to 24db/Oct with standard or custom Q, RMS compressor with soft knee and peak limiter. The 2 input levels are displayed by rows of 6 level LED + 1 clip LED, the 6 output levels are displayed by rows of 5 level LED + 1 clip LED + 1 Limiter LED. The unit has 2 analog inputs, a stereo digital SPDIF input, and 6 analog outputs. Linking functions between inputs and linking functions between outputs are available.

The Pc SW for the remote control via RS485 or USB is allowing to connect in net up to 32 units and is allowing to control full parameters of the processor, to show the phase of the filter setting and to adjust graphically the RMS compressor and the Peak limiter. The comprehensive standard specification also include up to 64 memories with security lockout and two password level settings.
